

NFSteeze Metaverse Boutique

*...A combination of style
and ease.....*

Project Goals

- Create a decentralized auction based on Solidity Contracts
- Tokenize Designs
- Create a Digital Marketplace to sell fashion NFTs

NFSteeze is an decentralized NFT Auction, offering inhabitants of the Metaverse and other VR communities access to exclusive designs by top fashion labels.

Our platform works with traditional and leading edge fashion designers, offering exclusive and limited edition designs for clothing and accessories.

NFTs for the Metaverse: a nascent market....

- Online luxury fashion NFT market projected to reach \$56BN by 2030
- Dolce and Gabbana Tiara NFT sells for \$300,000.
- In September of 2021, a collection of 777 pieces by designer Karl Lagerfeld sold out in under 1 minute.
- Lofty Brickell Residences Miami NFT art collection

Based on Solidity Contracts....

- Open Zeppelin
- Imported ERC
- 3 contracts

Learnings and Next Steps

- We were able to construct Solidity contracts and successfully deploy them.
- If we had more time, we would work on building a user interface for the auction.
